PROJECTS

Palmelo | AI-Based Sign Language Platform

React.js, Tailwind CSS, Firebase, MediaPipe

- Built a responsive React.js interface for real-time sign-language translation, integrating live video feed with MediaPipe output and multilingual speech rendering.
- Designed and implemented real-time chat UI and SOS alert components using Firebase, with focus on accessibility and low-latency updates.
- Structured reusable React components and managed application state for smooth real-time interactions.

TOXIQ | AI-Powered Toxicity Detection Platform

React.js, Tailwind CSS, REST APIs

- Built an interactive analytics dashboard in React.js to visualize toxicity and sentiment data, with responsive layout and clean data visualization.
- Consumed REST APIs to fetch and render live toxicity predictions in real time.
- Focused on UI performance and clarity to support fast, low-latency content moderation insights.
